Ahmed Fakhfakh

AI Engineer — LLMs , RAG Systems & Agentic AI Pipelines
+216 26 211 105 | fakhfakhahmed26@gmail.com | LinkedIn | GitHub

Summary

AI Engineer specialising in RAG systems, agentic LLM pipelines, finetuning and memory-augmented AI. Designed and deployed end-to-end LangChain/LangGraph workflows from multi-document retrieval to self-improving multi-agent systems.

Professional Experience

AI Engineer Jun 2026 – Oct 2026
CFAC Group

- Designed **Chatbots and AI Agent workflows** integrated with **Odoo ERP** to automate cross-functional business operations across **HR, Finance, Audit, and IT**.
- Built **n8n automation pipelines** enabling real-time process orchestration, automated reporting, and elimination of repetitive tasks to optimize operational efficiency and time/cost savings.
- Containerized and deployed **LLM engines**, vector databases, and microservices using **Docker** across virtual machines and server infrastructure.

AI Engineer Feb 2026 – Jun 2026
KPIT Technologies

- Designed an **agentic LangGraph workflow** that transforms automotive scenarios into validated **Python/Robot test cases** with deterministic review and dry-run validation.
- Built a **4-layer memory architecture** (Core, Episodic, HITL, FAISS) with knowledge promotion pipeline **0.942 avg quality score** over 210 runs and **78% time reduction** vs manual.

AI/ML Engineer Intern | **GitHub** Jun 2024 – Aug 2024
VisShop AI

- Real-time people counting with **YOLOv8 + DeepSORT** with **95% accuracy at 30 FPS**; optimized latency 150ms→**33ms/frame**.

Software Development Intern Jun 2023 – Jul 2023
HABEMUS

- Built leave management system (C#, SQL Server) reducing approval time 12h→6h for 200+ employees.

AI Projects (LLM & RAG Systems)

EduRAG: AI-Powered Academic Q&A & Learning Assistant | GitHub Dec 2024 – Jan 2025

- Designed a **multi-document Q&A system** using RAG (LangChain, GPT-3.5, FAISS + ChromaDB) to replace manual document search with **85% retrieval accuracy**, **90% answer relevance**; containerised with Docker and served via FastAPI.

AutoRAG : Self-Improving Agentic RAG Feb – Apr 2025

- Built a **self-improving multi-agent RAG** (LangGraph) with Planner → Retriever → Evaluator → Reflector loop; **LLM-as-Judge + RAGAS** evaluation: **+15% faithfulness**, **-30% token cost**.

RAG Agent Finance With HITL Sep – Oct 2025

- Finance RAG agent (GPT-4o-mini, LangChain) with **page-level evidence**, **HITL correction loop**, and **JSONL persistent memory** human corrections auto-reused across runs via similarity-based override.

Aspect-Based Sentiment Analysis with LoRA | GitHub Jan – Apr 2025

- Fine-tuned **DistilBERT with LoRA adapters** (PEFT) on 5,000 restaurant reviews for aspect-level sentiment, improved F1 **67%→91%**; built dashboard with aspect extraction and reporting via **Streamlit + FastAPI**.

MLOps: Real-Time Stock Prediction Nov – Dec 2024

- MLOps pipeline for real-time Apple stock forecasting (Flask) with automated retraining **15% MAPE**.

PFA: Hybrid RL Knapsack Optimization Sep 2024 – Jan 2025

- Hybrid **Genetic Algorithm + Actor-Critic RL** for knapsack optimisation **+12% improvement** over OR-Library baselines.

Education

National School of Electronics & Telecommunications (ENET'COM) Sfax, Tunisia
B.Eng. in Data Engineering & Decision Systems *2023 – 2026*

- HR Manager, Google Developer Student Club (GDSC) , Organized multiple tech workshops for 200+ students.

Faculty of Sciences of Sfax Sfax, Tunisia
Pre-Engineering in Mathematics & Physics *2021 – 2023*

Technical Skills

Languages: Python, SQL, JavaScript, C#, TypeScript
LLMs & Agentic AI: LangChain, LangGraph, CrewAI, GPT-3.5/4, OpenAI API, RAG, Generative AI, AI Agents, n8n
ML/DL: PyTorch, TensorFlow, scikit-learn, Keras
Backend & MLOps: FastAPI, Docker, Flask, Streamlit, Git/GitHub
Databases & Search: MongoDB, ChromaDB, Neo4j, FAISS, PostgreSQL, ElasticSearch
Computer Vision: YOLOv8, OpenCV, DeepSORT, TensorFlow Lite

Certifications & Training

NVIDIA LLM Evaluation — 2025 — *LoRA, PEFT, LLM, prompt engineering* **NVIDIA Deep Learning** — 2025 — *CNNs, RNNs, model deployment* **DataCamp PyTorch** — 2024 — **DIGILOC Competition** — 2024

Languages

Languages: Arabic (Native), French (C1), English (B2)
Soft Skills: Team Leadership, Technical Communication, Project Management
